RE: NPDES Permit No. ID-002205-5, City of Lewiston

Dear Mr. Wessels:

Our attention has been brought to a typographical error on page 4 of the permit which was mailed to you on November 26, 2001_ .

Table 1 requires grab sampling for phosphorus, total ammonia, and nitrite plus nitrate as N. The sample method that should be used for these parameters is a 24-hour composite sample. Attached are replacements pages 3/4 of your permit. Please replace these pages in your copy of the permit. Our records will also be changed to reflect this correction.

Please contact Nickie Arnold in our Boise office at (208) 378-5757 if you have questions or other issues with your permit.

Sincerely,

Robert R. Robichaud, Manager
NPDES Permits Unit
